processing chambers through said transfer chamber and for carrying out said substrates having been processed to said cassette mounted at said position;

one atmospheric transfer apparatus for transferring said substrates to be processed or said substrates having been processed between said cassette mounted at said position and said load lock chamber and said unload lock chamber; and

gate valves provided respectively at an atmospheric side and a vacuum side of said load lock chamber and said unload lock chamber and for opening and closing at every carry-in and carry-out time, one-by-one of said substrates to be processed or said substrates having been processed so as to change over said load lock chamber or said unload lock chamber in an atmospheric atmosphere or a vacuum atmosphere,

wherein the transfer method comprises:

carrying in and carrying out said substrates to be processed or said substrates having been processed, one-by-one, between said load lock chamber or said unload lock chamber in the atmospheric atmosphere and said cassette mounted at said position.

REMARKS

The concurrently filed "Petition to Withdraw From Issue Based On 37 CFR §1.313(c)(2)", and also concurrently filed Request for Continued Examination Transmittal, are noted. Note that the Request for Continued Examination Transmittal requests not only entry of the present amendments, but also entry of the amendments set forth in the "Further Amendment
